Dear Hiring Manager,

57 Rue Alphonse Daudet,
44600 Saint-Nazaire

France

The June 14, 2022

Subject: IT Software engineer appliance

I'm excited at the idea of living international experiences that will allow me on the one hand to acquire new skills or work techniques, but above all it will allow me to discover new cultures. As someone who is highly focused and attentive to detail, I thrive on building quality systems that surpass end users' expectations. I'm thrilled at the opportunity to show off my technical expertise and leadership skills.

During my previous role at Autoliv ISO Delta as an apprentice, I was responsible for developing innovative solutions on a variety of software platforms to meet demands from teammates. I played a key role in the development of software solutions within the team which enabled computerization within the team. In the same way I was able to carry out a project which was essential to the team because it allowed the highlighting of the innovations of the company.

I am the ideal candidate for this position as I was employed as a computer engineer at Autoliv ISO Delta to create, design, and implement various systems analysis software and programs as well as at Accenture where I was able to maintain web applications for 1 month. I am currently studying computer engineering at CESI, which integrates the PBL learning technique which allows me to learn in a more autonomous way, thus resembling the professional world. During each of my experiences I was able to demonstrate teamwork and communication.

Thank you for your time and consideration. I'm excited about the opportunity to leverage my unique range of skills, and I'm eager to demonstrate my commitment to developing new software solutions.

Sincerely,
DIAS Bruno
